DETAILED ACTION

Ex Parte Quayle

This application is in condition for allowance except for the following formal matters:

Claim Objections

1. Claims 1-17 are objected to because of the following informalities:

With respect to claim 1, in lines 1-2, “characterized in that it comprises” should be changed to --comprising--.

With respect to claim 7, in line 4, --frame timing-- should be inserted right after “reference”.

With respect to claim 8, in line 6, “a normal one” should be changed to --a higher accurate one-- since all clocks are normal.

With respect to claim 11, in lines 6 and 12, “the inter-unit synchronizing timing” and “the intra-frame reference clock” lack antecedent basis.

With respect to claim 17, in lines 13-14, “the intra-frame reference frame timing” lacks antecedent basis.

Other claims are automatically objected to as they depend upon objected independent claim 1. Appropriate correction is required.

Allowable Subject Matter

2. Claims 1-17 contain the allowable subject matter but are objected to for minor informalities.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art does not teach or fairly suggest each of the interface units includes a main signal processing section for performing signaling main signal frame to the main signal processing unit based on the intra-apparatus reference frame timing distributed from the frame timing distribution section of the main signal processing unit, as specified in independent claims 1 and 17.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
